So one atom says to the other atom, "hey, i think i just lost an electron..."

the other atom says, "are you sure?"

the first atom replies, "yep, i'm positive." 😊

(ok, i admit it's corny.)

MOB:

I just read your joke to my wife (my best homebrew amp customer) and she said it reminded her of the time she had a drink of Uranium.

I said "How did you know that you drank Uranium?"

She said, "I got A-TOMIC ache !"

I love her.
