Rob Luter Indiana, USA	Sep 2nd, 2001 07:34 AM Edit Profile <hr/> A while back there was a post that discussed a mod that would allow the reverb to function on channel one too. Anyone know how to pull this off?
rholoman	Sep 3rd, 2001 10:49 PM Edit Profile <hr/> The way I did this with mine was to run a wire from the preamp side of R12 to the preamp side of R25. You also need to disconnect one end of R12.

Rob Luter Indiana, USA	Sep 4th, 2001 11:24 AM Edit Profile <hr/> Did you get the results you expected? Any problems? -Rob
rholloman	Sep 5th, 2001 11:59 AM Edit Profile <hr/> No problems so far. It gave me the reverb and vibrato on both channels, and that was what I wanted, so yes, I got the results I was expecting.
